ACKNOWLEDGMENTS

The authors wish to acknowledge the immeasurable grace and profound kindness to “Almighty Allah” the most gracious and the supreme ruler of the universe, who enabled us successfully completing this project for the degree of Bachelor of Science in Computer Science and Engineering. The authors express their sincere and heartfelt gratitude, deep appreciation and regards to the teachers and project supervisor, Md. Kamrul Islam, Assistant Professor, Department of Computer Science and Engineering, Jessore University of Science & Technology, Bangladesh, for his affectionate encouragement, solitary instruction, valuable suggestion, sympathetic co-operation and scholastic supervision through the project work during producing this dissertation. The authors find it a great pleasure in expressing their heartfelt gratitude and immense indebtedness to their honorable and respected all teachers from the same department they belong for their inspiration and valuable suggestion, constructive criticism and advice for the completion of the project work and preparation of the project. Finally the authors are expressing their cordial thanks to all their friends, relatives and well-wishers.

ABSTRACT

After the war between British and King Siraj-u-dollah at Polashi in 1757, the land of Bangla goes to the British over 200 years; they tortured the people from this subcontinent though they consumed tax and other facilities. This rule was closed in 1947 when the subcontinent was divided into two independent country called India and Pakistan. Pakistan was again divided into two parts East Pakistan and West Pakistan though there was a long distance of about 1200 miles between them. But after 1947, West Pakistan began to torture East Pakistan beyond imagination. But the people from East Pakistan raised their voice for their right. The movements for language in 1952, the rise of six agendas in 1966, the success of national election in 1969 were clear proof of movement. Finally in 1971, the voice of freedom was raised by West Pakistan with the leadership of Bangobondhu Sheikh Mujibur Rahman. As a result, the war of liberation was happed when the West Pakistan attacked at the midnight of 25th March, 1971. After the genocide, people for the nation of Bangladesh never bowing down to West Pakistan. After then freedom fighter members show the readers the great sacrifice that the freedom fighter had made in 1971 to liberate from Pakistani occupation. Whether or not freedom fighter could liberate Bangladesh on its own is a mere academic question, since India, burdened with the problem of 10 million Bangladeshi refugees, was in no position to wait for that. The government and the people of Bangladesh also preferred a quicker end to their agony. The freedom fighter did what it could, and history shows that its performance not only made life miserable for the Pakistan Army, but also paved the way for a speedy Indian victory. That is why for the people of Bangladesh, Muktiyoddha (freedom fighter) and Muktiyuddho (liberation war) are connected inseparably. Pakistani Army, lowering their morale and creating such a hostile environment that their ability to operate was restricted and they were virtually confined to their fortified locations. The overall achievements of the freedom fighters and the East Bengal Regiments were enormous. Their contribution was a crucial element in the operations prior and during full scale hostilities. After the independence of Bangladesh in 1971, the memory and the history of freedom fighters of Bangladesh do not collect and colligate accordingly. For this reason, our project is build up to gather and in letters of all information properly.
